

June 1, 2017

Dear Prospective Volunteer,

We are pleased that you have taken the initiative to inquire about the St. Francis Medical Center High School Volunteer Program.

As a volunteer, you will have the opportunity to gain new skills and build on abilities you already have. Additionally, you will be placed in a capacity where you will interact with a diverse population and experience the satisfaction that comes with positively touching the lives of all those who come through our doors. Volunteers' time, efforts and talents make a difference every day as they play an integral role in helping to make our medical center a hallmark of care and service within our community.

St. Francis Medical Center is a comprehensive health care facility with one of the busiest Emergency/Trauma Centers in the region, a Primary Stroke Center, a STEMI Receiving Center, and Maternal-Child Health, Surgical, and Behavioral Health services. As an essential provider of critical health care services, we require the full commitment and participation of our volunteers as they are placed with highly qualified and respected staff throughout the medical center.

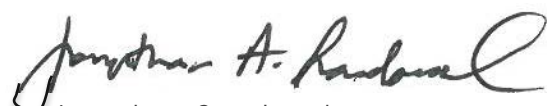

Due to the limited amount of High School Student Volunteers we are able to orient and train, we screen and interview those students who have fully completed and submitted the application prior to the **June 30, 2017**, deadline. Applications must be submitted in person to the Volunteer Department. Incomplete and/or late applications will not be considered.

Thank you again for choosing St. Francis Medical Center and helping to build a healthier community.

Sincerely,

Gilda Acosta-Gonzalez
Director, Community Health Initiatives & Volunteer Svcs.

Jonathan Sandoval
Program Coordinator, Volunteer Svcs.
